PROFESIONAL SUMMARY

IT Infrastructure, Network, and FMS Engineer with 10 years of experience delivering reliable IT and telecommunications solutions across mining and industrial operations. Proven track record in leading infrastructure deployments, managing multi-site network environments, and ensuring service availability through SLA-driven performance monitoring. Experienced in supervising cross-functional coordination, supporting operational teams, and driving technology initiatives that improve productivity, connectivity, and business continuity. Skilled in network engineering, Windows and Linux server administration, Virtual Private Network Site to HO, radio communication systems, Fleet Management Systems (FMS), CCTV, GPS tracking, and fiber optic infrastructure. Recognized for strong leadership, problem-solving capabilities, and the ability to align technical solutions with operational objectives in demanding environments

SKILL

Technical Skills

- IT Support, IT Infrastructure, Network Engineering, and Fleet Management System (FMS)
- Mikrotik Administration (MTCNA, MTCRE, QoS and Bandwidth Management)
- Linux Server Administration (Prometheus, Grafana, Zabbix)
- FMS (Focus & Minelink)
- Service Level Agreement (SLA) Monitoring
- Windows Server Administration (Active Directory, DNS, DHCP, File Server)
- Fiber Optic Installation and Maintenance
- Network Devices: Cambium, Aruba, Ubiquiti, UniFi, Ruijie, and TP-Link
- CCTV Systems (Analog, Digital, and IP Cameras)

Soft Skill

- Leadership
- Problem Solving
- Team Collaboration
- Effective Communication

EDUCATION

Vocational Education Program Politeknik Balikpapan (2020)

- Vocational Program in Network Administration Kominfo

State Vocational High School 2 Balikpapan (2013 – 2016)

- Computer and Network Engineering (Average Grade: 82.5/100)
- Final Practical Examination: Debian 9 Server Administration

TRAINING AND CERTIFICATION

- Working at Height Certification – Intercoach (Feb 2023 – May 2029)
- MikroTik Certified Routing Engineer (MTCRE) – IDN Network (Jul 2025 – Jul 2028)
- Ruijie NGFW (Next-Generation Firewall) – IDN Network (May 2026 – Lifetime)
- Defensive Driving Course – ITC College (Apr 2024 – Lifetime)
- MikroTik Certified Network Associate (MTCNA) – GPM Network (Nov 2023 – Nov 2026)
- Computer Network Technician Certification – BNSP, BBPLK Bekasi (Dec 2021 – Dec 2023)
- Junior Network Administrator Certification – BNSP, Ministry of Communication and Information Technology (Kominfo) (Nov 2020 – Nov 2023)

EXPERIENCE

Foreman ICT | PT. Sinar Terang Mandiri, Tbk | 26 January 2026 – Present

- Managed internet access for over 400 active devices and users across the organization.
- Provided leadership and coordination for HRGA teams in supporting field IT projects, driving faster project execution and ensuring successful delivery within operational targets
- Administered bandwidth allocation using QoS methods (HTB, Queues, and departmental bandwidth segmentation), improving network efficiency based on business priorities.
- Implemented SLA monitoring using PRTG Network Monitor, achieving a minimum network availability target

of 85%.

- Configured File Sharing Services and Active Directory on Windows Server 2022, improving internal data transfer efficiency, productivity, and security by up to 80%.
- Deployed and maintained UPS systems, increasing network availability and reducing service interruptions by up to 50%.
- Deployed and maintained LAN and WAN infrastructure across mining operational areas, supporting reliable business connectivity.
- Deployed Diamond V2R Base Station antennas, extending radio communication coverage to more than 5 kilometers.
- Installed and terminated fiber optic networks to improve network scalability, high-speed connectivity, and low-latency communications.
- Configured Fingerspot attendance systems to support workforce attendance management for more than 300 employees.
- Configured and maintained Motorola radio communication devices, including XiR M3688, XiR C2660, and XiR P6620i.
- Configured and managed network infrastructure devices, including Mikrotik RB450Gx4, Mikrotik RB1100AHx4, Ubiquiti airFiber/5AC Gen2, UniFi AC Pro, Ruijie Access Points, and TP-Link switches.
- Optimized radio communication performance through antenna matching and SWR tuning, reducing reflected power and extending the operational lifespan of radio equipment.
- Managed and maintained IT asset inventories and documentation to improve asset lifecycle management and operational efficiency.
- Documented daily operational activities and prepared weekly and monthly technical reports.
- Collaborated with cross-functional departments and client representatives to identify, coordinate, and successfully deliver IT projects, improving operational effectiveness and business continuity.

Coordinator IT | PT. Sentosa Laju Sejahtera | June 2023 – September 2025

- Provided and maintained internet connectivity across six active project locations in Sulawesi Area , including Amindo, Bosowa, CGG, RKU, SMN, and the Kendari Hub.
- Led and coordinated with HRGA teams at multiple project sites to support IT troubleshooting, incident resolution, and operational continuity.
- Deployed and maintained Virtual Private Network (VPN) connections between site locations and the Head Office (HO)
- Implemented SLA monitoring and reporting using Grafana, Prometheus, and Zabbix, achieving a network availability target of 85%.
- Deployed and maintained LAN and WAN infrastructure across mining operational areas, ensuring reliable connectivity and supporting business operations.
- Deployed Diamond V2R Base Station antennas, extending radio communication coverage beyond 5 kilometers.
- Installed and maintained fiber optic infrastructure to improve network scalability, high-speed connectivity, and low-interference communications across wide-area environments.
- Configured Fingerspot attendance systems to support workforce attendance management for more than 300 employees.
- Configured and maintained Motorola radio communication devices (XiR M3688, XiR C2660, and XiR P6620i), Mikrotik RB450Gx4 routers, Ubiquiti 5AC Gen2 point-to-point radios, UniFi AC Pro access points, Ruijie access points, and TP-Link switches.
- Optimized radio communication performance through antenna matching and SWR tuning, reducing reflected power and extending the operational lifespan of radio equipment.
- Managed and maintained IT asset inventories and documentation to improve asset lifecycle management and operational efficiency.
- Prepared and maintained comprehensive technical documentation, including weekly and monthly operational reports.
- Collaborated with cross-functional departments and project stakeholders to identify, coordinate, and successfully deliver IT initiatives, improving operational efficiency and business continuity.

Senior Engineer | PT. Satnetcom | December 2021 – June 2023

- Installed and maintained CCTV and GPS tracking systems to enhance workplace security, asset monitoring, and employee compliance.
- Configured GPS-based speed limit controls on operational vehicles to improve road safety and ensure compliance with company transportation policies.
- Installed and configured Fatigue Monitoring Cameras to detect driver fatigue and improve

workplace health and safety standards.

- Deployed and maintained FOCUS FMS (United Tractors) and Minelink FMS (Satnetcom) systems on A2B, ATU, and support units to optimize fleet utilization and operational performance.
- Configured and maintained network infrastructure devices, including Mikrotik, Ruijie, Cambium, Aruba, Grid Antennas, Sector Antennas, and Omni Antennas to support Fleet Management System (FMS) operations.
- Installed solar power systems, including solar panels and associated wiring, to improve the availability and reliability of FMS network equipment in remote operational areas.
- Maintained comprehensive documentation of project activities and system performance to support KPI monitoring and operational analysis.
- Collaborated closely with clients and end users to maximize system utilization, provide technical support, and ensure successful adoption of deployed solutions.

IT Support | PT. Ganesha Operation | July 2019 – August 2021

- Installed and maintained LAN infrastructure across four branch offices in the Balikpapan area, ensuring reliable network connectivity and business operations.
- Provided hardware and software troubleshooting support for computers, printers, and end-user devices, minimizing operational downtime.
- Designed promotional brochures and marketing materials to support educational program campaigns.
- Developed and maintained examination and tryout result reports using Microsoft Access databases.
- Processed and digitized student examination answer sheets (LJK) using Fujitsu document scanners, improving data accuracy and processing efficiency.
- Analyzed and consolidated examination results using Microsoft Excel formulas, enabling efficient student performance evaluation and reporting.
- Supported telemarketing campaigns through WhatsApp broadcast (WA Blast) activities, contributing to increased customer engagement and sales performance.
